*(Submitted previously)* \* C. The Office of Logistics, Printing and Photography Division (OL/P&PD) is continuing to work on two small changes in the Office of Public Affairs (OPA) program entitled CIA and Its People. These changes are being made at the request of the Director of Central Intelligence (DCI) and the Agency's Executive Director (EXDIR). When completed, CIA and Its People will be available in both 16mm film and all video cassette formats. This P&PD production will be shown to all EOD's and will be used for Agency public affairs/recruiting activities. The changes to this program will be completed by 25 April 1986. In the interim, P&PD received approval from OPA to show the current version of this production at the recent Blue Collar Mid-Career Course.

25X1 *NO* D. On Tuesday, 15 April 1986, the Office of Logistics, Printing and Photography Division (OL/P&PD) Copier Management Staff (CMP) met Procurement Division (PD) representatives to discuss problems involved in transferring funds between Directorates for copier funding. As matters now stand, components may not fund their own copier requirements. All copiers are to be funded through CMP.

25X1 *NO* E. The Office of Logistics, Printing and Photography Branch (OL/P&PD) continues to study the issue of secure printing. Last week representatives from P&PD met with personnel from Flow Cytometry Standards Corporation. This company is involved in the manufacture of secure printing

25X1 Many questions remain unanswered as to its benefit to secure printing and the feasibility of adapting this technique to the offset printing process. P&PD will continue to seek the answer to these questions. 25X1

*NO* F. The Office of Logistics, Printing and Photography Division (OL/P&PD) is implementing a plan for the improvement of its mission to support requirements for computer generated graphics. This plan calls for revisions in equipment, physical facilities, staffing, and workflow. Some adjustments to staffing and workflow are already in the process of being made by P&PD management. According to the 5-year CPM (Critical Path Method) Chart the first year's activities consist of a critical path of 22 weeks that includes, but is by no means limited to:

1. Procurement of additional Dicomed computer graphics equipment to increase production by approximately 40% and to create a system reliability of 98%;

2. The creation of a computer-based image cross-referencing system for all original images composed on the Dicomed, and,
